PROFESSIONAL SUMMARY

Diploma in Computer Science & Technology student and full-stack developer who has built and deployed three web applications with JavaScript, TypeScript, React, Next.js, Node.js, and MongoDB. Experience with REST API development, database design with Prisma, role-based authentication, and online payment integration (SSLCommerz). Seeking an entry-level Software Engineer or Web Developer role.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Next.js, Node.js, Express.js, HTML5, CSS3

Styling & UI: Tailwind CSS, daisyUI, Responsive Web Design

Databases & ORM: MongoDB Atlas, Prisma ORM, RESTful APIs

Auth, Storage & Payments: Better Auth, Cloudflare R2, SSLCommerz payment gateway

Tools & Deployment: Git, GitHub, VS Code, Vercel, Postman

KEY PROJECTS

EduNexus – Full-Stack School Management System (Team Project)

Tech Stack: TypeScript, React.js, Next.js, Node.js, Express.js, Prisma ORM, Better Auth, Cloudflare R2, SSLCommerz, Tailwind CSS

[Live Demo](#) | [Client Repo](#) | [Server Repo](#)

- **Student Dashboard:** Built the student-facing dashboard in TypeScript and React, where students track fee history, view notices, and access course materials.
- **Online Fee Payments (SSLCommerz):** Integrated payment initiation, success/fail/cancel callbacks, and IPN with server-side validation of transaction ID and amount. Handled duplicate payments, abandoned/pending sessions, and late-fine logic; students can pay monthly, fine, and exam fees and view receipts.
- **Team Contributions:** Worked with the team on Cloudflare R2 storage for profile images and academic PDFs, Better Auth role-based access (Admin/Student/Teacher), and Prisma schemas and queries.

Loop Market – Full-Stack E-Commerce Application

Tech Stack: JavaScript, React.js, Node.js, Express.js, MongoDB, Tailwind CSS

[Live Demo](#) | [Client Repo](#) | [Server Repo](#)

- Built and deployed a full-stack e-commerce app with dynamic product filtering, client-side state management, and live data fetching from a REST API.
- Created responsive UI components with Tailwind CSS that work across mobile and desktop screens.
- Configured API requests and hosting for continuous deployment on Vercel.

FurHome – Pet Adoption Platform

Tech Stack: JavaScript, Node.js, Express.js, MongoDB, Tailwind CSS

[Live Demo](#) | [Client Repo](#) | [Server Repo](#)

- Built a responsive platform where users search, filter, and submit adoption requests for pets.
- Implemented interactive UI features, including image carousels with smooth slide transitions.
- Connected a MongoDB database to Node.js REST APIs and implemented full CRUD operations.

EDUCATION & TRAINING

Diploma in Computer Science & Technology (CST) – Barguna Polytechnic Institute 2nd Year, Ongoing
Relevant Coursework: Programming Fundamentals, Data Structures, Database Systems, Web Development.

Complete Web Development Course – Programming Hero MERN Stack Bootcamp Dec 2025 – Jun 2026
Six-month program covering modern JavaScript, the MERN stack (MongoDB, Express, React, Node), and production deployment.
